EDUCATIONAL FORMULA

Technical Education

Students are taught the practical applications of the principles they are learning through hands-on training centered around authentic problem solving in the form of collaboration, troubleshooting, and brainstorming, using up-to-date equipment.

General Education

Provides a foundation that complements the students' technical education with written and oral communication, critical thinking, social and computational skills, as well as global and diversity awareness, and information literacy.

Work Ethic Education

Taught through formal courses of study, requiring students to adhere to a well-defined appearance code, maintain a strictly enforced attendance record, and exhibit behavior appropriate to that expected in the workplace.
